Attachments: ATT00001.txt

Hi Jacquie and Roger,

We have some operation and maintenance costs from DuPont below.

Jenny,

As you know, we sample quarterly Bed 1 and Bed 2 and only analyze Bed 2 when we have a detection in Bed 1. We also sample well PT/Influent annually.

With that scope, the annual costs for monitoring are around \$3,500-4,000, including reporting, QC, etc. A carbon change out is around \$2,000, but that happens less frequently, every 3-5 years, with max. at 5 years (for the North American Aqua systems we are using).

Is this enough info or do you need more specific information?

Thanks.....Andrew

Hi Andrew,

Thank you. We are looking for information on residential systems.

Have a good afternoon,
Jenny

Jenny, that question will be for me. Costs for residential system or public system?

Hi Kathy,

For another site, we are trying to quantify the costs of monitoring and maintaining the GAC filters that are being used for PFOA removal near Washington Works. Are you able to share that information with me?

Thank you,
Jenny
